

Digital Divide

Implications for Equity, Access, and Influence

- The term "digital divide" refers to:
 - different levels of access to computing devices
 - different access to the Internet across socioeconomic and geographic groups
- Questions:
 - What is the Internet access speed at your home?
 - At school?
 - In the town of Lakefield?

Digital Divide

Implications for Equity, Access, and Influence

He said, “Too many Manitobans — more than in any other part of the country — are deprived of the opportunity of reliable internet and cell service. In particular, our rural and northern communities. In particular, our Indigenous communities.”

The network in question is owned by Manitoba Hydro and includes thousands of kilometres of fibre-optic cable, created to communicate with northern hydroelectric facilities and to transmit data.
